Index of Subjects

Adenovirus type 8 keratoconjunctivitis – an outbreak and its treatment with topical human fibroblast interferon, 557
African swine fever, the distribution of ticks of the *Ornithodoros moubata* complex (Ixodoidea: Argasidae) in Malawi, and its relation to, epizootiol , 535

Bandicota bengalensis, the susceptibility of *Rattus rattus* and, to a new anticoagulant rodenticide, flocoumafen, 475
Beef, microbiology of, carcasses before and after slaughterline automation, 205
BK virus, age-dependent prevalence of, IgG and IgM antibodies measured by enzyme-linked immunosorbent assays (ELISA), 523
Bluetongue virus, recovery of, serogroup from sera collected for a serological survey from apparently healthy cattle, from the Sudan, 529
Brucellosis, comparison of the brucellin skin test with the lymphocyte transformation test in bovine, 403

Campylobacter, cryptosporidium plus: an outbreak in a semi-rural population, 95
Campylobacter jejuni in broilers: the role of vertical transmission, 153
Campylobacter jejuni, monoclonal antibodies directed against the flagella of: cross-reacting and serotypic specificity and potential use in diagnosis, 377
Campylobacter jejuni: monoclonal antibodies directed against the flagella of, production, characterization and lack of effect on the colonization of infant mice, 131
Campylobacter jejuni, the protection of infant mice from colonization with, by vaccination of the dams, 143
Campylobacter, natural, colonization in chickens raised under different environmental conditions, 385
Campylobacter species, the cellular fatty acid composition of, isolated from cases of enteritis in man and animals, 225
Candida albicans, the frequency distribution and consistency of assimilation biotypes of, 89
Chlamydia trachomatis, the detection of, by direct immunofluorescence in conjunctival smears from patients with trachoma and patients with ophthalmia neonatorum using a conjugated monoclonal antibody, 83
Chlamydiosis in birds in Great Britain. 1. Serological reactions to chlamydia in birds sampled between 1974 and 1983, 447
Chlamydiosis in birds in Great Britain. 2. Isolations of *Chlamydia psittaci* from birds sampled between 1976 and 1984, 453
Chicken, inhibition of colonization of the, caecum with *Salmonella typhimurium* by pre-treatment with strains of *Escherichia coli*, 161
Chickens, natural campylobacter colonization in, raised under different environmental conditions, 385
Clostridium difficile, detection, of, toxins by enzyme immunoassay, 5
Clostridium difficile in general practice and community health, 13
Coconut, microbiological quality of desiccated, 19
Cryptosporidiosis, the incidence of: a two-year prospective survey in a children's hospital, 107
Cryptosporidium plus campylobacter: an outbreak in a semi-rural population, 95

Diet and faecal flora in three dietary groups in rural northern Nigeria, 59
Diphtheria toxin, detection of, antibodies in human sera in New Zealand by ELISA, 415

Enteritis, the cellular fatty acid composition of *Campylobacter* species isolated from cases of, in man and animals, 225
Escherichia coli, inhibition of colonization of the chicken caecum with *Salmonella typhimurium* by pre-treatment with strains of, 161

Faecal flora, diet and, in three dietary groups in rural northern Nigeria, 59

Fosfomycin, *in vitro* and *in vivo* study of, in methicillin-resistant *Staphylococcus aureus* septicaemia, 419
Faecal viruses, excretion of, during the first year of life including attendance at a day nursery in Lisbon, Portugal, 545
Flocoumafen, field trials of, against warfarin-resistant infestations of the Norway rat (*Rattus norvegicus* Berk.), 467
Flocoumafen, the susceptibility of *Rattus rattus* and *Bandicota bengalensis* to a new anticoagulant rodenticide, 475
Food poisoning, international outbreak of staphylococcal, caused by contaminated lasagne, 67
Foot and mouth disease, humoral response of pregnant sows to, vaccination, 501
Fusobacterium necrophorum, the adverse effect of dilution on the infectivity of, culture, 199

Hand-disinfection, evaluation of procedures for hygienic: controlled parallel experiments on the Vienna test model, 27
Hepatitis B vaccine, comparison of the immunogenicity, efficacy and safety of 10 μg and 20 μg of a: a prospective randomized trial, 491
Hydatid, further investigations of a, focus in North-West Scotland, 113
Hydatid, the epidemiology of, disease in England and Wales, 121

Immunization, impact of population density on, programmes, 459
Influenza A, infection with, H1N1. 1. Production and persistence of antibody, 335
Influenza A, infection with, H1N1. 2. The effect of past experience on natural challenge, 345
Influenza, immunoglobulin G, A and M response to, vaccination in different age groups: effects of priming and boosting, 513
Influenza, the method of transmission of epidemic: further evidence from archival mortality data, 353
Interferon adenovirus type 8 keratoconjunctivitis – an outbreak and its treatment with topical human fibroblast, 557
Intravenous catheters, self-disinfecting plastics for, and prosthetic inserts, 185

Legionella pneumophila, the relationship between the serogroup and lipopolysaccharide of, 39

Meningitis, tuberculous – clinical and laboratory review of 100 patients, 231
Methicillin, bacteriological characters of strains of *Staphylococcus aureus* submitted to a reference laboratory related to, resistance, 217
Mycobacterium bovis, geographic distribution of restriction types of, isolated from brush-tailed possums (*Trichosurus vulpecula*) in New Zealand, 431
Mycoplasma pneumoniae, antibody levels to, in sera collected from healthy donors of Wellington, New Zealand, during 1976–80, 249
Mycoplasma pulmonis, urinary-tract infection by, in mice and its wider implications, 439

Ophthalmia neonatorum, the detection of *Chlamydia trachomatis* by direct immunofluorescence in conjunctival smears from patients with trachoma and patients with, using a conjugated monoclonal antibody, 83

Plague, experimental, infection in South African wild rodents, 171
Plastics, self-disinfecting, for intravenous catheters and prosthetic inserts, 185
Poliovirus antibody in Northern Greece, 479
Prosthetic inserts, self-disinfecting plastics for intravenous catheters and, 185

Rabies vaccine, purified Vero cell, and human diploid cell strain vaccine: comparison of neutralizing antibody responses to post-exposure regimens, 483
Rappaport-Vassiliadis media, a study of the relative efficiencies of three commercially available dehydrated, 425
(*Rattus norvegicus* Berk.), field trials of flocoumafen against warfarin-resistant infestations of the Norway rat, 467
Rattus rattus, the susceptibility of, and *Bandicota bengalensis* to a new anticoagulant rodenticide, flocoumafen, 475

Rotavirus, institutional outbreaks of, diarrhoea: potential role of fomites and environmental surfaces as vehicles for virus transmission, 277
Rotavirus, molecular epidemiology of human, 265
Rotaviruses, variation in virulence of bovine, 257
Rubella epidemiology in South East England, 291
Rubella, quantitative investigations of different vaccination policies for the control of congenital, syndrome (CRS) in the United Kingdom, 305

Salmonella typhimurium, inhibition of colonization of the chicken caecum with, by pre-treatment with strains of *Escherichia coli*, 161
Salmonella typhimurium, tracing, infections, 1
Staphylococcal, international outbreak of, food poisoning caused by contaminated lasagne, 67
Staphylococcus aureus, bacteriological characters of strains of, submitted to a reference laboratory related to methicillin resistance, 217
Staphylococcus aureus, *in vitro* and *in vivo* study of fosfomycin in methicillin-resistant, septicaemia, 419

Ticks, the distribution of, of the *Ornithodoros moubata* complex (Ixodoidea: Argasidae) in Malawi, and its relation to African swine fever epizootiology, 535
Toxins, detection of *Clostridium difficile*, by enzyme immunoassay, 5
Trachoma, the detection of *Chlamydia trachomatis* by direct immunofluoresence in conjunctival smears from patients with, and patients with ophthalmia neonatorum using a conjugated monoclonal antibody, 83
Tuberculous meningitis – clinical and laboratory review of 100 patients, 231

Vaccination, quantitative investigations of different, policies for the control of congenital rubella syndrome (CRS) in the United Kingdom, 305
Vaccination, the protection of infant mice from colonization with *Campylobacter jejuni* by, of the dams, 143
Vibrio cholerae, the impact of physico-chemical stress on the toxigenicity of, 49

Water, sanitary study of surface, and of the beach of a water sports and leisure complex, 393
Water, studies on microbial quality of filtered, in households of a university community in Nigeria, 239
Water, the seasonality of bacterial quality of, in a tropical developing country (Sierra Leone), 75
